Summary

To provide the public access to tax parcel polygons and a select set of assessment roll attributes for multiple counties in a single file.

Description

This file contains primarily 2015 parcel data only for NY State counties which gave the NYS GIS Program Office (GPO) permission to share this data with the public. Work to obtain parcel data from additional counties, as well as permission to share the data, is ongoing. To date, 16 counties have provided the GPO permission to share their parcel data with the public. Parcel data for counties which do not allow the GPO to redistribute their data must be obtained directly from those counties. The GPO's goal is to eventually include parcel data for all counties in New York State.

Parcel geometry was incorporated as received from County Real Property Departments. No attempt was made to edge-match parcels along adjacent counties. County attribute values were populated using 2015 Assessment Roll tabular data the GPO obtained from the NYS Department of Tax and Finance's Office of Real Property Tax Services (ORPTS). This tabular data was joined to the county provided parcel geometry using the SWIS & SBL or SWIS & PRINT KEY unique identifier for each parcel.

The 16 counties included in this file are as follows:

Cayuga	NYC- Queens
Chautauqua	NYC- Richmond (Staten Island)
Cortland	Orange
Erie	Rensselaer
Greene	Tompkins
NYC- Bronx	Ulster
NYC- Kings (Brooklyn)	Warren
NYC- New York (Manhattan)	Westchester

Credits

Contributing counties, NYS Office of Information Technology Services GIS Program Office (GPO) and NYS Department of Taxation and Finance's Office of Real Property Tax Services (ORPTS).

Use limitations

GIS DATA IS PROVIDED AS IS AND WITHOUT ANY WARRANTY, EXPRESS OR IMPLIED, AS TO THEIR PERFORMANCE, MERCHANTABILITY, OR FITNESS FOR ANY PARTICULAR PURPOSE. The GPO, ORPTS, and contributing counties do NOT represent or warrant that the GIS data or the data documentation provided are error-free, complete, current, or accurate.

DESCRIPTION SOURCE NYS GPO Statewide Parcel Map Program

FIELD **NYS_NAME_SOURCE** ▶

* ALIAS NYS_NAME_SOURCE

* DATA TYPE String

* WIDTH 50

* PRECISION 0

* SCALE 0

FIELD DESCRIPTION A code to describe the means by which the parcel was determined to be State-owned (OWNER_TYPE = 2) and what State agency (NYS_NAME) owns or operates on that parcel.

Code Format:

X-Y-ZZ-y

X- Owner Name match (1) or no match (0)

Y- Verifying Dataset match (2) or no match (0)

ZZ- Single Agency (SA); Multiple Agency (MA); Multiple Private (MP); No Agency (NA)

y- Verifying Dataset: look up in the "NYS Name Source Table". Sub-datasets are indicated by a period (.) followed by a Roman numeral

EXMAPLE:

1-2-SA-d.i

1 = Primary and/or Additional Owner Names in the assessment roll indicates the parcel is State-owned and/or the Agency Name

2 = a verifying dataset indicates the parcel is State-owned and/or the Agency Name

SA = it is determined by the Name or verifying dataset that a Single Agency owns/operates on this parcel

d.i = look up in the "NYS Name Source Table" to see which dataset was used for verification. Dataset "d.i" is a sub-dataset of dataset "d" in the lookup table.

Current NYS Name Source Lookup Table:

FIELD **DUP_GEO** ▶

* ALIAS DUP_GEO

* DATA TYPE String

* WIDTH 5

FIELD DESCRIPTION "Y" indicates a duplication of parcel geometry. Some parcels contain multiple housing units (e.g. condominiums) and the entire parcel polygon is duplicated for each owner and address in that parcel. Each of these duplicated parcel polygons has a separate SBL, Owner, Address, etc, but the underlying geometry is duplicated and coincident for all the separate owners/addresses within the parcel. Some parcels on village boundaries are assessed in both the village and the bordering town. In this case, the parcel polygon geometry with the same SBL, Owner, Address, etc, is duplicated, but the assessment records have separate SWIS codes and assessment values. **DUPLICATED PARCEL POLYGONS SHOULD BE TAKEN INTO CAREFUL CONSIDERATION WHEN PERFORMING AREA CALCULATIONS OR PARCEL COUNTS ON GROUPS OF PARCELS, AS THE DUPLICATE PARCEL POLYGONS WILL INFLATE RESULTS.**

FIELD DESCRIPTION

GIS calculated acres (US) of the parcel.

See the DUP_GEO field description for full explanation of duplicated parcel geometry that exists within this dataset. **DUPLICATED PARCEL POLYGONS SHOULD BE TAKEN INTO CAREFUL CONSIDERATION WHEN PERFORMING AREA CALCULATIONS OR PARCEL COUNTS ON GROUPS OF PARCELS, AS THE DUPLICATE PARCEL POLYGONS WILL INFLATE RESULTS.**
